Subject: 582 Moseley Road

Would it be possible to get a structural engineer to look at 582 Moseley Road, Moseley - the former offices of the tram depot.

I was able look around inside this building on Friday and I am very concerned that efforts to strengthen the foundations of the buildings have not been completed and in some places not attempt has been made to reinforce the foundations..

A video showing the condition of the building and the foundations can be seen at <http://www.youtube.com/watch?v=yv2Yxk5Eegg>

The building has been in this condition since Summer 2006
